

Fig. 1

A detailed cross-sectional view of a multi-layered structure, labeled 1. The structure consists of several layers and components. At the top, there is a thin layer 16, followed by a thicker layer 18. Below these, there is a central layer 2, which is further divided into sub-layers 5, 8, 13, 6, 10, 10, 6, 13, 8, 11, 9, and 7. A bracket 3 groups the top right portion of the structure, including layers 18, 15, 14, and 17. A bracket 2 groups the bottom right portion of the structure, including layers 11, 9, and 7. The structure is shown in a perspective view, with a wavy line indicating a cross-section.

A schematic diagram of a multi-layered structure, possibly a stack of thin films or a multi-layered material. The structure consists of two main sections, each containing a stack of horizontal layers. The layers are represented by horizontal lines with circular ends. The left section has a bracket labeled '10' on its right side, and the right section has a bracket labeled '11' on its right side. A dashed line labeled '13' is shown on the left side of the left section, and a solid line labeled '12' is shown at the bottom of the left section. A solid line labeled '13' is shown on the right side of the right section, and a dashed line labeled '12' is shown at the bottom of the right section.
